

Test Fixtures—WK

Cimbian UK Ltd.

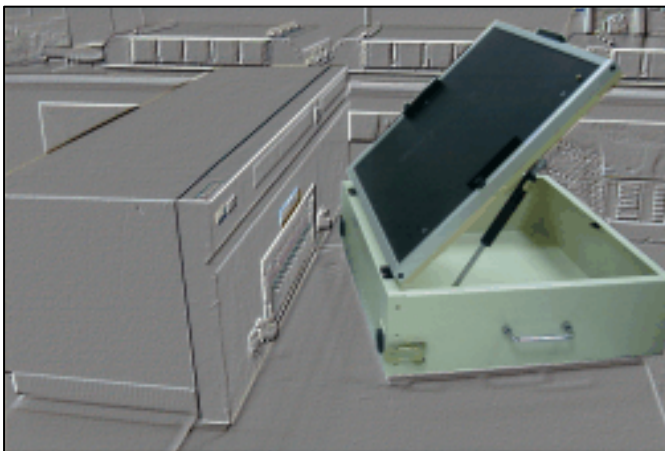

Capital investment in ATE is just part of the equation, ongoing cost of ownership is another, with much of this taken up in fixturing.

Whether you use MDA, ICT, integrated functional test or custom test solutions you need to have a source of low cost but highly reliable fixturing.

The range of test fixtures available from Cimbian include vacuum, pneumatic, manual, edge connector, double-sided, dual well, dual stage and are available for most recognised ATE marques, including Agilent, Jet, Okano, Teradyne & Genrad, Tescon and Wayne Kerr (WK).

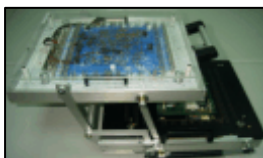

Choose from our range of fixture kits for local or self-customisation or fully configured and customised before despatch.

Fixtures customisation is available from your CAD data and even kits of your own design can be supplied.

Wayne Kerr 930/950/2930/2950

- Over 12 years experience
- MDA/ICT/functional
- Kits or customised
- Vacuum, Pneumatic, Manual
- Two stage, dual well, double-sided
- Most ATE manufacturers types
- CAD/CAM manufacturing
- CAD customisation
- Fine-pitch
- ESD control
- High quality
- Competitive pricing

Test Fixtures - Taking cost out of ownership

Test Fixtures

Cimbian UK Ltd.
