

Test Contacts

Cimbian UK Ltd.

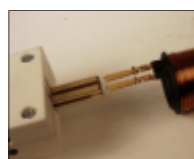

The weakest link in your test station is probably the spring-probe. These tiny mechanisms take a beating and here you need high quality but, because you have so many, they need to be low cost. Cimbian's German partner, Tekon, uses world renowned German precision to produce probes of the highest quality, yet their prices are as competitive as those in Asia.

Need a special probe? Tekon's in-house expertise can design and manufacture customised spring probes to your specifications in volumes that make sense to you.

Where you may need to access a special connector, perhaps an edge connector, then Tekon can provide the full design and manufacturing service to build custom contacts using manual, electro-mechanical or pneumatic operation.

- Std. spring probe range
- Pneumatic, Manual, Electro-mechanical
- Fine-pitch custom or spring probe
- High quality
- Competitive pricing
- Small quantity orders
- Four wire capability
- Custom engineering
- Innovation
- German precision
- Choice of finish plating

Test Contacts - Taking uncertainty from test interfacing

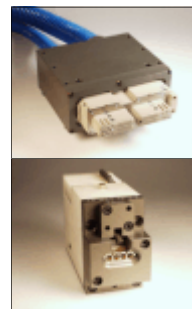

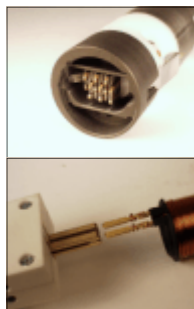

Test Contacts

Cimbian UK Ltd.

Tekon has been producing innovative and technically challenging customised connectors for many years.

During this time Tekon has earned a reputation for high quality, reliable and cost-effective contact engineering throughout German industry. These products and services are now uniquely available in the UK from Cimbian UK Ltd.

Next time you face a contact problem or if you simply want to use high quality, affordable spring contacts in your bed of nail fixtures call Cimbian UK to discuss your needs.

Test contact are designed and manufactured in Germany by Tekon Prüftechnik GmbH.
